Metabolic recruitment of spinal locomotion: intracellular neuromodulation by trace amines and their receptors

Purinergic signalling in neuroregeneration
Burnstock G. (p1919)

ROCK inhibition as a novel potential strategy for axonal regeneration in optic neuropathies
Van Hove I, et al. (p1949–1950)

Pharmacological inhibition of cation-chloride cotransporters for neurological diseases
Nepomuceno R and Sun D. (p1924–1925)

To myelinate or not to myelinate: fine tuning cAMP signaling in Schwann cells to balance cell proliferation and differentiation
Manje PV. (p1936–1937)

The inositol metabolism pathway as a target for neuroprotective strategies
Nyström AM and Yang AW. (p1928–1929)

Rethinking the standard trans-cortical approaches in the light of superficial white matter anatomy
Latini F and Ryffel M. (p1906–1909)

Target morphology and cell memory: a model of regenerative pattern formation
Nikolai Besanov, Michael Levin, Nadja Morozova, Natalia Reinberg, Alen Tosenberger, Vitaly Volfert
Interferon beta (IFN-β) treatment exerts potential neuroprotective effects through neurotrophic factors and novel neurotensin/neurotensin high affinity receptor 1 pathway

Qin Wang, Yang Mao-Draayer

Releasing Nrf2 to promote neurite outgrowth

Chuanbin Yang, Yuanyuan Cheng, Jiao Zhao, Jianhui Rong

To myelinate or not to myelinate: fine tuning cAMP signaling in Schwann cells to balance cell proliferation and differentiation

Paula V. Monje

Hypertonic saline: a brief overview of hemodynamic response and anti-inflammatory properties in head injury

Matheus Fernandes de Oliveira, Fernando Campos Gomes Pinto

Metabolic recruitment of spinal locomotion: intracellular neuromodulation by trace amines and their receptors

Shawn Hochman

Enhanced motor cortex excitability after spinal cord injury

Nardone Raffaele

Dental pulp stem cells-derived schwann cells for peripheral nerve injury regeneration

Heba Al-Zer, Heba Kalbouneh

N-Propionylmannosamine: using biochemical glycoengineering to promote peripheral nerve regeneration

Georgios Koulaxouzidis, Werner Reutter, Christian Witzel

ROCK inhibition as a novel potential strategy for axonal regeneration in optic neuropathies

Inge Van Hove, Evy Lefevere, Lieve Moons

The role of Islet-1 in cell specification, differentiation, and maintenance of phenotypes in the vertebrate neural retina

Gervasio Martín-Partido, Javier Francisco-Morcillo

Repair, protection and regeneration of spinal cord injury

Xiao-juan Cao, Shi-qing Feng, Chiang-feng Fu, Kai Gao, Jia-song Guo, Xiao-dong Guo, Xi-jing He, Zi-wei Huang, Zhong-hai Li, Ling Liu, Rong-hai Liu, He-Zuo Li, Xi-fan Mei, Bin Ning, Guang-zhong Ning, Chang-hui Qian, Jie Qin, Yan-zhen Qu, Saijilafu, Bo Shi, Tao Su, Tian-sheng Sun, Jian Wang, Jin-kun Wen, Jian Xiao, Bin Xu, Hai-dong Xu, Pan-pan Yu, Zhi-cheng Zhang, Yong Zhou, Yu-long Zhou

Target morphology and cell memory: a model of regenerative pattern formation
Nikolai Bessonov, Michael Levin, Nadya Morozova, Natalia Reinberg, Alen Tosenberger, Vitaly Volpert

Rethinking the standard trans-cortical approaches in the light of superficial white matter anatomy
Francesco Latini, Mats Ryttlefors

Dental pulp stem cells for treating neurodegenerative diseases
Christopher Shamir, Chatra Venugopal, Anandh Dhamushkodi

Regenerative potential of targeting glycogen synthase kinase-3 signaling in neural tissues
Eui-Man Jung, Jeffrey J. Moffat, Woo-Yang Kim

Deriving striatal projection neurons from human pluripotent stem cells with Activin A
Zoe Noakes, Marija Fjodorova, Meng Li

What can Drosophila axonal development teach us about nerve regeneration?
Sofia J. Araujo

Purinergic signalling in neuroregeneration
Geoffrey Burnstock

Platelet-rich plasma: the role in neural repair
Margherita Giorgetti, Gabriele Siciliano

Self-healing hydrogel for tissue repair in the central nervous system
Fu-Yu Hsieh, Ting-Chen Tseng, Shan-hui Hsu

Pharmacological inhibition of cation-chloride cotransporters for neurological diseases
Rachel Nepomuceno, Dandan Sun

All roads go to Salubrinal: endoplasmic reticulum stress, neuroprotection and glial scar formation
Lorenzo Romero-Ramirez, Manuel Nieto-Sampedro, M. Asunción Barreda-Manso

The inositol metabolism pathway as a target for neuroprotective strategies
Arne M. Nystuen, Andy W. Yang

Attenuation of endoplasmic reticulum stress as a treatment strategy against ischemia/reperfusion injury
Chih-Li Lin
Cranial Nerve Injury Repair and Neural Regeneration

Lycium barbarum polysaccharides promotes in vivo proliferation of adult rat retinal progenitor cells
Hua Wang, Benson Wai-Man Lau, Ning-li Wang, Si-ying Wang, Qing-jun Lu, Raymond Chuen-Chang Chang, Kwok-fai So

Brain Injury Repair and Neural Regeneration

Neuroprotective effects of salidroside on focal cerebral ischaemia/reperfusion injury involve the nuclear erythroid 2-related factor 2 pathway
Jing Han, Qing Xiao, Yan-hua Lin, Zhen-zhu Zheng, Zhao-dong He, Juan Hu, Li-dian Chen

Peripheral Nerve Injury Repair and Neural Regeneration

Polyurethane/poly(vinyl alcohol) hydrogel coating improves the cytocompatibility of neural electrodes
Mei Li, Hai-han Zhou, Tao Li, Cheng-yun Li, Zhong-yuan Xia, Yanwen Y. Duan

Neuroplasticity in post-stroke gait recovery and noninvasive brain stimulation
Yi Xu, Qing-hua Hou, Shawn D. Russell, Bradford C. Bennett, Andrew J. Sellers, Qiang Lin, Dong-feng Huang

Constraint-induced movement therapy promotes motor function recovery and downregulates phosphorylated extracellular regulated protein kinase expression in ischemic brain tissue of rats
Bei Zhang, Qiang He, Ying-ying Li, Ce Li, Yu-long Bai, Yong-shan Hu, Feng Zhang

In vitro model of the blood-brain barrier established by co-culture of primary cerebral microvascular endothelial and astrocyte cells
Yan Wang, Ning Wang, Biao Cai, Guang-yun Wang, Jing Li, Xing-xing Piao

Mononuclear cells from the cord blood and granulocyte-colony stimulating factor-mobilized peripheral blood: is there a potential for treatment of cerebral palsy?
Hani Koh, Kyoujung Hwang, Hae-Young Lim, Yong-Joo Kim, Young-Ho Lee

A novel method for evaluating brain function and microstructural changes in Parkinson’s disease
Ming-fang Jiang, Feng Shi, Guang-ming Niu, Sheng-hui Xie, Sheng-yuan Yu

Spinal Cord Injury Repair and Neural Regeneration

Electroacupuncture promotes the recovery of motor neuron function in the anterior horn of the injured spinal cord
Jian-hui Yang, Jian-guo Lv, Hui Wang, Hui-yong Nie

Transplantation of human telomerase reverse transcriptase gene-transfected Schwann cells for repairing spinal cord injury
Shao-juan Zhang, Min-fei Wu, Jia-hei Liu, Ye Li, Qing-san Zhu, Rui Gu

Cranial Nerve Injury Repair and Neural Regeneration

Lycium barbarum polysaccharides promotes in vivo proliferation of adult rat retinal progenitor cells
Hua Wang, Benson Wai-Man Lau, Ning-li Wang, Si-ying Wang, Qing-jun Lu, Raymond Chuen-Chang Chang, Kwok-fai So

Exogenous nerve growth factor protects the hypoglossal nerve against crush injury
Li-yuan Fan, Zhong-chao Wang, Pin Wang, Yu-yan Lan, Ling Tu

Constraint-induced movement therapy promotes motor function recovery and downregulates phosphorylated extracellular regulated protein kinase expression in ischemic brain tissue of rats
Bei Zhang, Qiang He, Ying-ying Li, Ce Li, Yu-long Bai, Yong-shan Hu, Feng Zhang

In vitro model of the blood-brain barrier established by co-culture of primary cerebral microvascular endothelial and astrocyte cells
Yan Wang, Ning Wang, Biao Cai, Guang-yun Wang, Jing Li, Xing-xing Piao

Mononuclear cells from the cord blood and granulocyte-colony stimulating factor-mobilized peripheral blood: is there a potential for treatment of cerebral palsy?
Hani Koh, Kyoujung Hwang, Hae-Young Lim, Yong-Joo Kim, Young-Ho Lee

A novel method for evaluating brain function and microstructural changes in Parkinson’s disease
Ming-fang Jiang, Feng Shi, Guang-ming Niu, Sheng-hui Xie, Sheng-yuan Yu

Neural Regeneration Research’s Newly Appointed Youth Editorial Board Members from China in 2015
