A long term aim of nuclear reprogramming is surely to understand neural regeneration – possibly the most important aim of nuclear reprogramming.

—John Gurdon (23 Sept 2015)
INVITED REVIEWS

Does being female provide a neuroprotective advantage following spinal cord injury? 1533
Jeffrey P. Datto, Jackie Yang, W. Dalton Dietrich, Damien D. Pearse

Ischemic long-term-potentiation (iLTP): perspectives to set the threshold of neural plasticity toward therapy 1537
Maximilian Lenz, Andreas Vlachos, Nicola Maggio

Delayed peripheral nerve repair: methods, including surgical 'cross-bridging' to promote nerve regeneration 1540
Tessa Gordon, Placheta Eva, Gregory H. Borschel

HIGHLIGHTS

Neuroprotection and recovery from early-life adversity: considerations for environmental enrichment 1545
Amanda C. Kentner

The emerging roles of transplanted radial glial cells in regenerating the central nervous system 1548
Robin E. White, Denis S. Barry

Targeting α7 nicotinic acetylcholine receptors: a future potential for neuroprotection from traumatic brain injury 1552
Samuel S. Shin, C. Edward Dixon
