Parkinson's disease
Alzheimer's disease

November 2017, Volume 12, Number 11
Should we have a guard against therapeutic nihilism for patients with severe traumatic brain injury? 
Ryan Hirschi, Casey Rommel, Gregory W. J. Hawryluk

Targeting inflammation to reduce brain injury in growth restricted newborns: a potential treatment? 
Julie A Wixey, Paul B Colditz, Stella Tracey Björkman

Targeting transcriptional regulators to regenerate midbrain dopaminergic axons in Parkinson’s disease 
Shane V. Hegarty, Aidéen M. Sullivan, Gerard W. O’Keeffe

Targeting mitoNEET with pioglitazone for therapeutic neuroprotection after spinal cord injury 
Alexander G. Rabchevsky, Samir P. Patel, Patrick G. Sullivan

Motor neuroprosthesis for injured spinal cord: who is an ideal candidate? 
Monzurul Alam, Yong-ping Zheng

Therapeutic capacities of human and mouse skeletal muscle-derived stem cells for a long gap peripheral nerve injury 
Tetsuro Tamaki

Pathophysiology of periventricular leukomalacia: what we learned from animal models 
Nahla Zaghloul, Mohamed Ahmed

DJ-1 as a deglycating enzyme: a unique function to explain a multifaceted protein? 
Federica De Lazzari, Marco Bisaglia

Outlook on the neuroprotective effect of estrogen 
Xavier d’Anglemont de Tassigny

MicroRNAs as diagnostic markers and therapeutic targets for traumatic brain injury 
Bridget Martinez, Philip V. Peplow

Interferon regulatory factor 2 binding protein 2: a new player of the innate immune response for stroke recovery 
Hsiao-Huei Chen, Alexandre F. R. Stewart

Regulation of neuronal survival by DNA methyltransferases 
Judit Symmank, Geraldine Zimmer

Endogenous retinal neural stem cell reprogramming for neuronal regeneration 
Romain Madelaine, Philippe Mourrain

Design and criteria of electrospun fibrous scaffolds for the treatment of spinal cord injury 
Barbara Vigani, Silvia Rossi, Giuseppina Sandri, Maria Cristina Bonferoni, Franca Ferrari

Taking out the garbage: cathepsin D and calcineurin in neurodegeneration 
Andreas Aufschnaiter, Verena Kohler, Sabrina Büttner

The role of general anesthetics and the mechanisms of hippocampal and extra-hippocampal dysfunctions in the genesis of postoperative cognitive dysfunction 
Marco Cascella, Sabrina Bimonte

ΔN-Bcl-xL, a therapeutic target for neuroprotection 
Han-A Park, Elizabeth A. Jonas

INDEX
Spinal Cord Injury and Neural Regeneration

Neural progenitor cells but not astrocytes respond distally to thoracic spinal cord injury in rat models
Tara Nguyen, Yilin Mao, Theresa Sutherland, Catherine Anne Gorrie

Globose basal cells for spinal cord regeneration
Durai Murugan Muniswami, Indirani Kanakasabapathy, George Tharion

Peripheral Nerve Injury and Neural Regeneration
Evaluation of sensory function and recovery after replantation of fingertips at Zone I in children
Zhao-wei Zhu, Xiao-yan Zou, Yong-jun Huang, Jiang-hui Liu, Xi-jun Huang, Bo He, Zeng-tao Wang

Vegetative Nerve Injury and Nerve Regeneration
Effects of neuregulin-1 on autonomic nervous system remodeling post-myocardial infarction in a rat model
Xin Lai, Liang Zhong, Hai-xia Fu, Song Dang, Xin Wang, Ning Zhang, Gao-ke Feng, Zi-qiang Liu, Xi Wang, Long Wang

Neurodegenerative Diseases and Neural Regeneration
Saponins from Panax japonicus attenuate age-related neuroinflammation via regulation of the mitogen-activated protein kinase and nuclear factor kappa B signaling pathways
Li-li Deng, Ding Yuan, Zhi-yong Zhou, Jing-zi Wan, Chang-chen Zhang, Chao-qi Liu, Yao-yan Dun, Hai-xia Zhao, Bo Zhao, Yuan-jian Yang, Ting Wang

Ramulus Cinnamomi extract attenuates neuroinflammatory responses via downregulating TLR4/MyD88 signaling pathway in BV2 cells
Huan Yang, Xiao Cheng, Ying-lin Yang, Yue-hua Wang, Guan-hua Du

Calycosin improves cognitive function in a transgenic mouse model of Alzheimer’s disease by activating the protein kinase C pathway
Lei Song, Xiaoping Li, Xiao-xue Bai, Jian Gao, Chun-yan Wang

Nigral dopaminergic neuron replenishment in adult mice through VE-cadherin-expressing neural progenitor cells
Abir A. Rahman, Nathan K. Lai, Joshua E. Albright, Paige E. Urquhart, Abby R. Webb, Brad E. Morrison

Research on human glioma stem cells in China
Yao-dong Zhao, Quan-bin Zhang, Hua Chen, Xi-feng Fei, Yun-tian Shen, Xiao-yan Ji, Jia-wei Ma, Ai-dong Wang, Jun Dong, Qing Lan, Qiang Huang

Delayed degeneration of an injured spinothalamic tract in a patient with diffuse axonal injury
Sung Ho Jang, Hyeok Gyu Kwon

Activation of the Akt/mTOR signaling pathway: a potential response to long-term neuronal loss in the hippocampus after sepsis
Jia-nan Guo, Lin-yu Tian, Wen-yu Liu, Jie Mu, Dong Zhou

Expression of NG2 and platelet-derived growth factor receptor alpha in the developing neonatal rat brain
Ping Li, Heng-xi Li, Hong-yang Jiang, Lie Zhu, Hai-yong Wu, Jin-tao Li, Jiang-hua Lai

Ankle-brachial index and brachial-ankle pulse wave velocity are risk factors for ischemic stroke in patients with type 2 diabetes
Ting Li, Xiu-juan Wu, Xiao-min Chen, Si-bo Wang, Kang-ding Liu, Ying-qi Xing
