Neuroinflammation and comorbidities are frequently ignored factors in CNS pathology
Sandiu RE, et al. (p.1349–1355)

Adipose-brain crosstalk: do adipokines have a role in neuroprotection?
Little JP and Safdar A. (p.1381–1382)

Enhancing endogenous stem cells in the newborn via delayed umbilical cord clamping
Lawton C, et al. (p.1359–1362)

Can progesterone be a better alternative to dexamethasone for use in routine brain surgery?
Cheng SY and Leung GKK. (p.1379–1380)

Cell replacement therapy for central nervous system diseases
Tso D and McKinnon RD. (p.1356–1358)

Olfactory ensheathing cells for spinal cord repair: crucial differences between subpopulations of the glia
Ekberg JA and St John JA. (p.1395–1396)
The changes of oligodendrocytes induced by anesthesia during brain development
Danye Jiang, Sanghee Lim, Minhye Kwak, Yun Kyoung Ryu, C. David Mintz

Repairing peripheral nerve injury using tissue engineering techniques
Ernest W. Wang, Jun Zhang, Jason H. Huang

Epigallocatechin-3-gallate treatment to promote neuroprotection and functional recovery after nerve system injury
Pere Boadas-Vaello, Enrique Verdú

Olfactory ensheathing cells for spinal cord repair: crucial differences between subpopulations of the glia
Jenny A.K. Ekberg, James A. St John

From adaption to death: endoplasmic reticulum stress as a novel target of selective neurodegeneration?
Yiting Liu, James R. Connor

Tailoring of therapy for chronic inflammatory demyelinating polyneuropathy
Yusuf A. Rajabally

Substance P and its tachykinin NK1 receptor: a novel neuroprotective target for Parkinson’s disease
Emma Thornton, Robert Vink

Neuronal gene transcription modulates demyelination and remyelination in a mouse model of multiple sclerosis
Sofia Anastasiadou, Bernd Knöll

Application and implications of polyethylene glycol-fusion as a novel technology to repair injured spinal cords
George D. Bittner, Kiran K. Rokkappanavar, Jean D. Peduzzi

In search for novel strategies towards neuroprotection and neuroregeneration: is PPARα a promising therapeutic target?
Sandra Moreno, Maria Paola Cerù

Is hyperexcitability really guilty in amyotrophic lateral sclerosis?
Felix Leroy, Daniel Zytnicki

Subaxial cervical spine injury classification system: is it most appropriate for classifying cervical injury?
Rafael Martínez-Pérez, Francisco Fuentes, Victor S. Alemany
Brain Injury Repair and Neural Regeneration

Piroxicam-mediated modulatory action of 5-hydroxytryptamine serves as a “brake” on neuronal excitability in ischemic stroke
Pallab Bhattacharya, Anand Kumar Pandey, Sudip Paul, Ranjana Patnaik

Chitosan–collagen porous scaffold and bone marrow mesenchymal stem cell transplantation for ischemic stroke
Feng Yan, Wei Yue, Yue-lin Zhang, Guo-chao Mao, Ke Gao, Zhen-xing Zuo, Ya-jing Zhang, Hui Lu

Overexpression of brain-derived neurotrophic factor in the hippocampus protects against post-stroke depression
Hao-hao Chen, Ning Zhang, Wei-yun Li, Ma-rong Fang, Hui Zhang, Yuan-shu Fang, Ming-xing Ding, Xiao-yan Fu

Oxygen-glucose deprivation regulates BACE1 expression through induction of autophagy in Neuro-2A/APP695 cells
Rong-fu Chen, Ting Zhang, Yin-yi Sun, Ya-meng Sun, Wen-qi Chen, Nan Shi, Fang Shen, Yan Zhang, Kang-yong Liu, Xiao-jiang Sun

The role of Rho/Rho-kinase pathway and the neuroprotective effects of fasudil in chronic cerebral ischemia
Ya-yun Yan, Xiao-ming Wang, Yan Jiang, Han Chen, Jin-ting He, Jing Mang, Yan-kun Shao, Zhong-xin Xu

Effects of total saponins of Panax notoginseng on immature neuroblasts in the adult olfactory bulb following global cerebral ischemia/reperfusion
Xu He, Feng-jun Deng, Jin-wen Ge, Xiao-xin Yan, Ai-hua Pan, Zhi-yuan Li

Lactulose enhances neuroplasticity to improve cognitive function in early hepatic encephalopathy
Nan Yang, He Liu, Yao Jiang, Ji Zheng, Dong-mei Li, Chao Ji, Yan-yong Liu, Ping-ping Zuo

Modification of tenascin-R expression following unilateral labyrinthectomy in rats indicates its possible role in neural plasticity of the vestibular neural circuit
Botond Gaal, Einar Örn Jóhannesson, Amit Dattani, Agnes Magyar, Ildikó Weber, Clara Mateos

Cerebrospinal fluid from rats given hypoxic preconditioning protects neurons from oxygen-glucose deprivation-induced injury
Yan-bo Zhang, Zheng-dong Guo, Mei-yi Li, Si-jie Li, Jing-zhong Niu, Ming-feng Yang, Xun-ming Ji, Gao-wei Lv

Spinal Cord Injury Repair and Neural Regeneration

Hyperbaric oxygen therapy combined with Schwann cell transplantation promotes spinal cord injury recovery
Chuan-gang Peng, Shu-quan Zhang, Min-fei Wu, Yang Lv, Dan-kai Wu, Qi Yang, Rui Gu

Transplantation of erythropoietin gene-modified neural stem cells improves the repair of injured spinal cord
Min-fei Wu, Shu-quan Zhang, Rui Gu, Jia-bei Liu, Ye Li, Qing-san Zhu

Peripheral Nerve Injury Repair and Neural Regeneration

Polylactic-co-glycolic acid microspheres containing three neurotrophic factors promote sciatic nerve repair after injury
Qun Zhao, Zhi-yue Li, Ze-peng Zhang, Zhou-yun Mo, Shi-jie Chen, Si-yu Xiang, Qing-shan Zhang, Min Xue

Repair of peripheral nerve defects with chemically extracted acellular nerve allografts loaded with neurotrophic factors-transfected bone marrow mesenchymal stem cells
Yan-ru Zhang, Ka Ka, Ge-chen Zhang, Hui Zhang, Yan Shang, Guo-qiang Zhao, Wen-hua Huang

Stem Cell Therapy and Neural Regeneration

Stem Cell Ophthalmology Treatment Study (SCOTS) for retinal and optic nerve diseases: a case report of improvement in relapsing auto-immune optic neuropathy
Jeffrey N. Weiss, Steven Levy, Susan C. Benes

Optimal concentration and time window for proliferation and differentiation of neural stem cells from embryonic cerebral cortex: 5% oxygen preconditioning for 72 hours
Li-li Yuan, Ying-jun Guan, Deng-dian Ma, Hong-mei Du

Elastic modulus affects the growth and differentiation of neural stem cells
Xian-feng Jiang, Kai Yang, Xiao-qing Yang, Ying-fu Liu, Yuan-chi Cheng, Xu-yi Chen, Yue Tu

LETTER TO THE EDITOR

Is transcranial magnetic stimulation useful in posttraumatic disorders?
Wellinson Silva Pativa, Iuri Santana Neville, Felipe Fregni, Manoel Jacobsen Teixeira
