Hydrogen sulfide controls peripheral nerve degeneration and regeneration: a novel therapeutic strategy for peripheral demyelinating disorders or nerve degenerative diseases
Jung J and Jeong NY.

Long-term treatment with PP2 after spinal cord injury resulted in functional locomotor recovery and increased spared tissue
Risau OR, et al.

The Achyranthes bidentata polypeptide k fraction enhances neuronal growth in vitro and promotes peripheral nerve regeneration after crush injury in vivo
Cheng Q, et al.

Diffusion weighted MRI and tractography for evaluating peripheral nerve degeneration and regeneration
Simon NG and Klot M.

A novel artificial nerve graft for repairing long-distance sciatic nerve defects: a self-assembling peptide nanofiber scaffold-containing poly(lactic-co-glycolic acid) conduit
Wang XY, et al.

A novel mode of retinal regeneration: the merit of a new Xenopus model
Araaki M.
